

/Users/marcoromano/Music/Music/Media.localized

Import from iTunes

/Users/marcoromano/Music/Music/Media.localized

?

/Users/marcoromano/Music/MIXO/Music/marcoromano/Music/Music/Media.localized

?

1. Both folder path are different. Is this important, that I use on both computers the same folder path for synchronization? For example, I need to change the folder path from Computer 1 like Computer 2 ?

2. When I install on both computers rekordbox, in my understand I will put in the same path like Mixo have ?

3. When we have the same path on one computer between Mixo and rekordbox I still need to import changes from rekordbox to Mixo over the Import function of Mixo ?
